

**America's Transportation Infrastructure Act of 2019  
(Highway Title as Introduced in Committee)**

**Definitions**

- Amends the definition of construction to also mean assessing resilience as a part of a construction project and adding improvements that reduce the number of wildlife-vehicle collisions such as wildlife crossing structures.
- Creates definitions for:
  - Natural Infrastructure
  - Resilience
- The definition of operations and management amended to include the consideration of incorporating natural infrastructure.
