

Planning & Integration

ATLAS fare collection back office

Conduent provides the ATLAS fare collection back office which is a multi-tenant, account based platform serving agencies and riders. Open architecture APIs allow interoperability with multiple third-party providers. The service is built on proven e-ticketing base module supporting all payment types. Modular design supports many levels of function based on agency needs

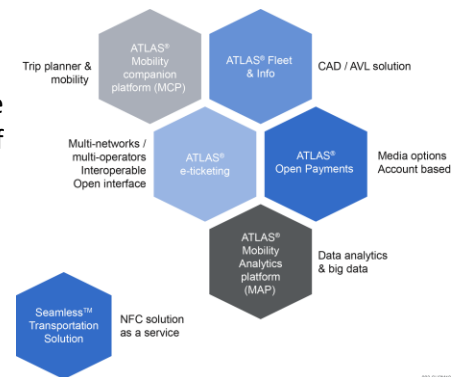

Partnership Opportunities: SaaS contract and other partnerships

Value/Benefits: The Atlas fare collection back office solves complicated technical issues that can prevent ease of use for the customer. By providing an open platform, agencies can provide riders with seamless payment options for their transit needs.
